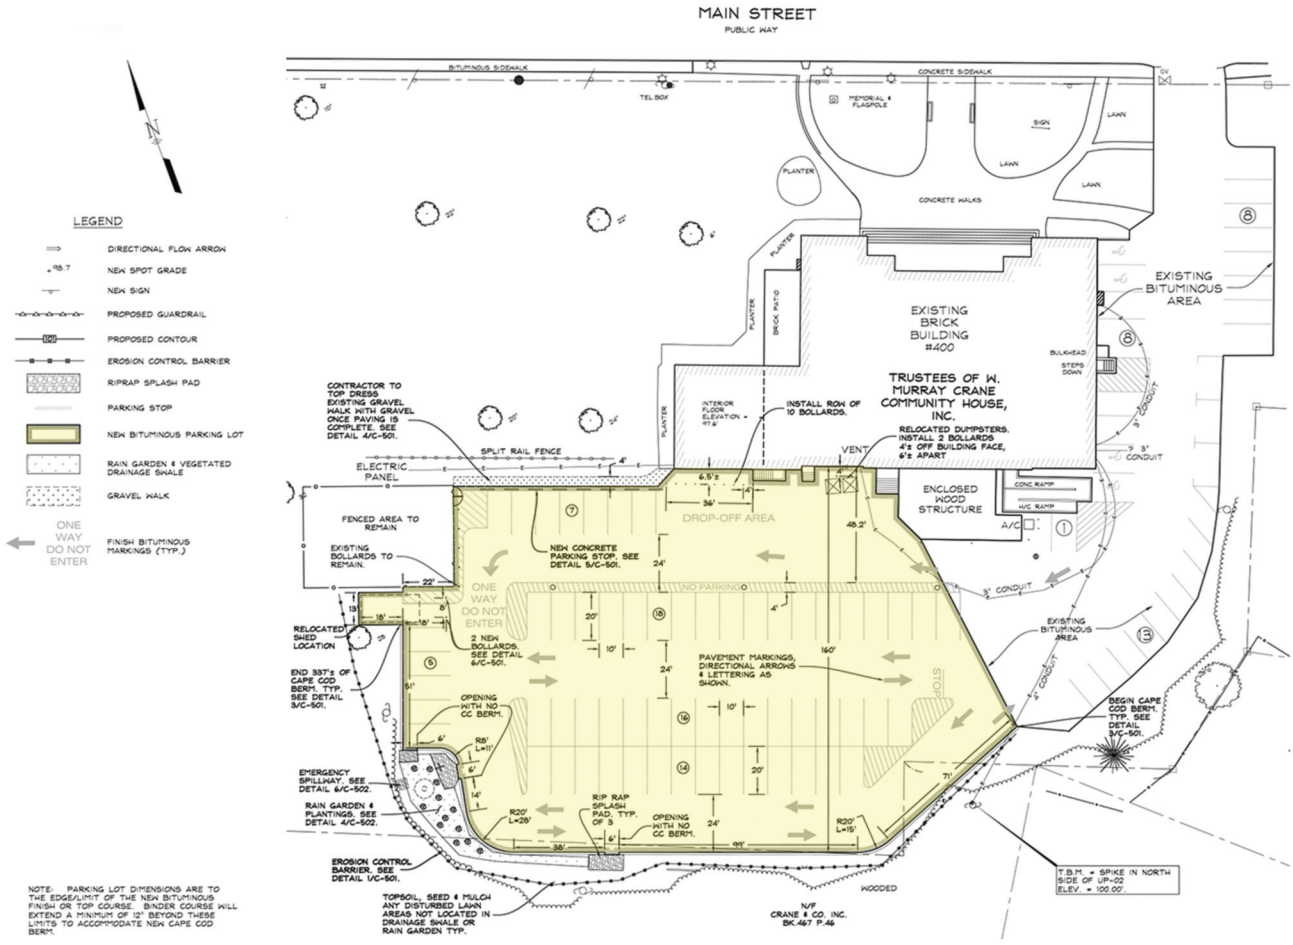
Parking Lot Upgrade Notice

In order to provide our customers with a safer and more secure area, the CRA will be upgrading the back parking lot. This will involve removing the solar panels, digging up and replacing the pavement and installing new lighting. The new lot will provide increased parking spaces and a brighter area at night.



This project will begin June 17th and, during construction, parking will be limited. We ask that you use the CRA side lot, street parking, and the DYC.

We thank you in advance for your patience while we are under construction.
